

POOL FENCE - SPIGOT

FGR-1800

FGR-1811 & FGR-1817

We offer two standard glass clamp profiles and the option of custom made glass clamp profiles.

Our glass clamp profiles can be used for various applications, a glass panel on a wall, cordoning off certain areas for pets, preventing access to a swimming pool for children. The possibilities are countless.

Our **FGR-1811** & **FGR-1817** glass clamp profiles have not been developed nor tested to function as glass balustrades where there is a risk of falling from < 1000mm.

Glass thicknesses from 10mm tempered to 55.2, 66.2 and even 88.2 are possible due to the opening of 19mm.

FGR-1811 & FGR-1817

The standard widths of 45mm apply to the **FGR-1811**, which has a profile height of 110mm, without base plate, and 170mm to the **FGR-1817**.

On request, we can also provide both types of glass clamp profile with a wider width, such as 90mm shown on the right.

FGR-1811 & FGR-1817

In the development of our **FGR-1811** & **FGR-1817**, we have strived to extend our vision to our products. Ease of use, especially ease of assembly and applied to concrete situations are central here.

Our base plates, equipped with adjusting screws and slotted holes to ensure quick and perfect assembly, can also be supplemented by counter plates.

By using counter plates **FGR-1800-CP** under the foot plates, you can easily push the adjusting screws onto those counter plates without having to fear damage to the surface.

Just think of dimples that you could otherwise make in a blue limestone that could crack open further or ask yourself how you could push the adjusting screws off on a soft surface.

FGR-1800-CP

FGR-1811 & FGR-1817

Unlike stainless steel ones, we offer a range of aluminum clamps to clamp the glass.

By using aluminum clamps, we can offer more options for finishing.

We can have our clamps anodised, in alu matt, alu black, bronze or gold....but we can also have them powder coated in the RAL color of your choice.

This allows you to personalize your glass clamps to your own taste.
